How we are using your information

Health and social care professionals across Coventry and Warwickshire are introducing two new electronic information systems to support with patient care.

The Integrated Care Record has been developed to bring together all your separate records from the different organisations involved in your health and social care. Having a more joined-up view will mean that you will get better and potentially faster treatment.
A separate electronic information system will also be used to analyse your information. This helps healthcare professionals to build a better understanding of your health, the circumstances in which you live, your needs, and the type of care you receive. This is known as 'Population Health Management'.

All organisations are committed to keeping patient data safe and always being clear about how it is used.

Your choice

You will automatically be opted into sharing your information onto these systems, but you have the **right to object at any time**.

You can choose to opt out of these systems by scanning the QR codes below for the system you are choosing to opt out from.

Integrated Care Record
